SHANKED TACTILE RANGE

Stainless Steel Tactiles

All of our stainless steel range are manufactured from grade 316. Stainless steel grade 316 gives better overall corrosion resistant properties than grade 304 and has particularly higher resistance to pitting and crevice corrosion in external environments.

Our tactiles are milled from one piece to ensure strength, durability and longevity.

All our products come with a full design life warranty

Sustamid Nylon PA12 Thermoplastic Tactiles

Our Sustamid based range of products provide all the benefits of our stainless steel system but with a reduced raw material cost to the consumer.

Lowest water absorption of all commercial polyamides – Dimensionally stable –
 Exceptional impact and notched impact strength
 Excellent low temperature capability down to -50° C
 Resistant to greases, oils, fuels, solvents and hydraulic fluids
 Exceptional resistance to stress cracking
 Excellent noise and vibration damping properties
 Excellent fatigue resistance under high load changes

SHANKLESS 3M TACTILE RANGE

Bumpeez™ shank-less stainless steel (grade 316) tactiles are a first to market, fully endorsed, health and safety tactile alert system. Developed in conjunction with one of the world's leading technology companies, Bumpeez™ are the world's first patented anti-slip tactile system that requires no drilling for installation.

TASS products are incredibly versatile and can provide an instant DDA and Equality Act 2010 compliant tactile surface to any platform edge, stairway or ramp due to their unique installation methods

Our products are fully approved by London Underground for use on under-ground and over-ground stations.

They are also approved under the Section 12, LU 1-085 Fire Safety standard. They are endorsed and used by Network Rail, Transport for London and are utilised worldwide across many industries including many Council 'streets for all' schemes.

The anti-slip inserts are available in a variety of colour options as well as luminous for safety areas. Our luminous products meet the requirements of DIN 67510 part 4 with respect to the luminescence of 10 - 60 minutes. Our 'TASS' range of products are fully compliant with BS 8300: 2009

Our heavy foot traffic anti-slip resin finishes (Tradenamed - Rez-Tred) can be applied onto virtually any surface including natural stone, terrazzo, ceramic, porcelain, vinyl floors, glazed tiles, metal, wood and glass.

Providing a reliable, long-lasting, R12 slip-resistant Equality Act 2010 compliant profile.

Perfect for both internal and external use.

All products can be retro fitted as well as factory installed.

RezTred™

Our resins adhere to natural stone perfectly.

Ideal for external and internal use on areas that experience very high foot traffic.

The only nosing system that can be applied to a staircase or platform radius.

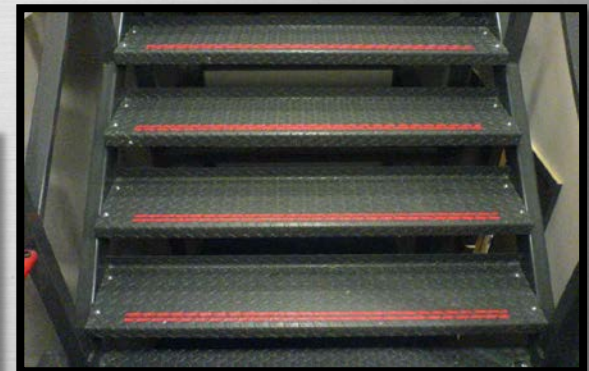

Aesthetically pleasing as well as effective, long lasting and available to client specifications in regards to profile.

RezTredTM LARGE AREA ANTI-SLIP SOLUTIONS

Our Rez-Tred anti-slip resin installations are perfect for industrial areas such as inspection pits, metal staircases, machinery booths, ramps and industrial kitchens.

With a proven track record across the oil industry and precision engineering factories.

RezTred™

ALUMINIUM NOSING PROFILES

Our Rez-Tred anti-slip resins are also available as an aluminium nosing profile offering easy installation. Using our RezTred resin system ensures that every trim that we offer (whether it be a slim-line or a heavy duty trim) conforms to all DDA requirements and is rated at R12 slip resistance.

RezTred™ ALUMINIUM LOGO NOSING PROFILES

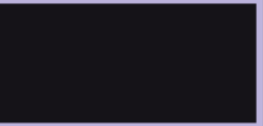

.Our resins can also be custom made to promote company logos, hazard warnings, directional logos etc.

SANITARY RESIN DISCS

Our 'Sanitary' resin range is specifically designed for high slip areas that have bare foot traffic, such as bathtubs, shower cubicles, spas, jacuzzi and saunas etc. DIY kits for ease of use.

Highly durable, non toxic, UV stable, mould resistant with easy maintenance have made this product highly sort after in the hospitality, hotelier and fitness business.

Kits available in both 25mm dia and 40mm dia discs.
Stocked colours - White, Grey, Transparent and Luminous
Other colours and sizes available upon request.

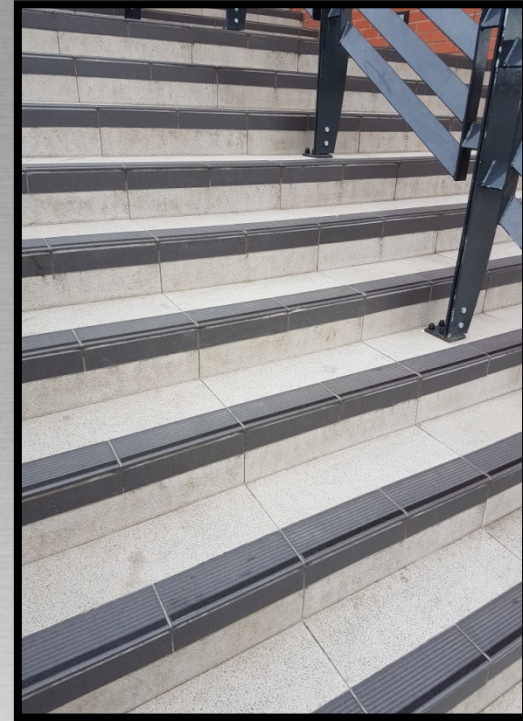

EASY INSTALL RESIN LINES

Our 'Eazi-Tred' R11 resin line range is specifically designed for high slip areas that require a solution without the inconvenience of area closures due to install times.

Suitable for both internal and external use.

Kits contain 2 x 600mm treads @ 40mm wide.
Stocked colours - White, Grey, Black, Yellow, Transparent and Luminous
Other colours and sizes available upon request.

Britain

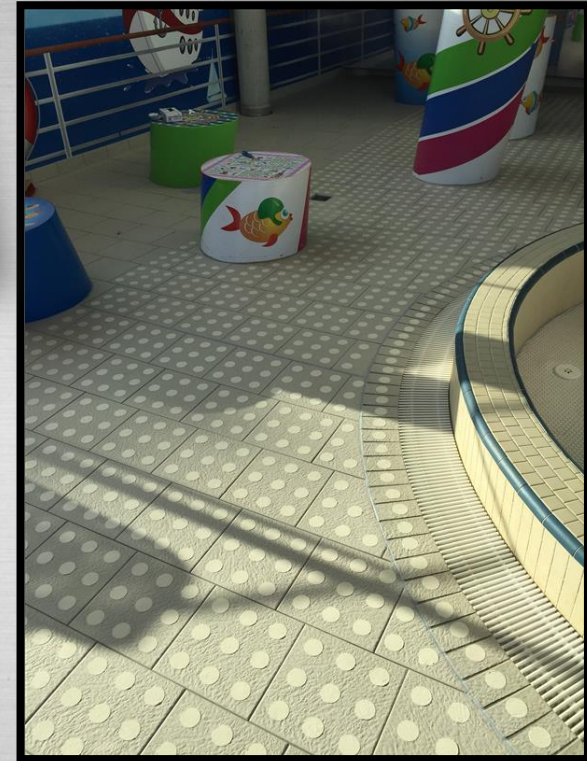

EASY INSTALL RESIN DISCS

Our 'Eazi-Tred' R11 resin disc range is specifically designed for the waterpark industry. Approved and commissioned by the European Waterpark Association for use in pools, aqua-parks, changing rooms etc where an effective anti-slip system is required.

Highly durable, non toxic, uv stable, mould resistant with easy maintenance have made this product highly sort after.

Approved by

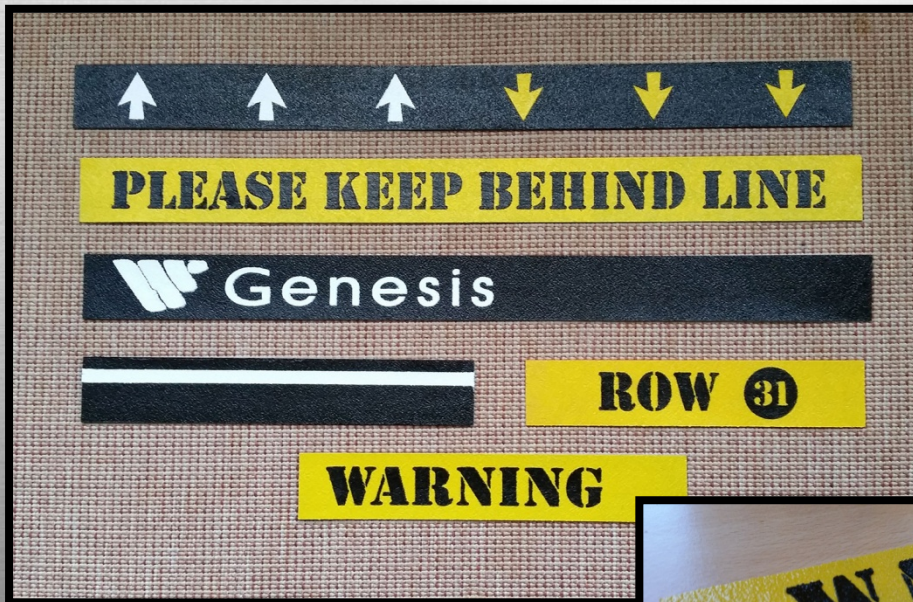

HAZARD WARNING LINING

Our 'Eazi-Tred' R11 resin line range is also available with bespoke text.

Perfect for warnings, directional advice and even company logos.

EASY INSTALL ANTI-SLIP PLATES

Our 'Eazi-Plate' system is the perfect product in areas where there is continued exposure to moisture, oil, grease or chemical spillage as well as substrate movement.

Areas such as wooden decking, marinas, machine workshops, inspection pits and factory steps are perfect for this product .

Pre-drilled aluminium base substrate with our patented R12 Reztred resin topped. Simply screw into place.

Kits contain 1 x 500mm treads @ 120mm wide.
Stocked colours - White, Grey, Black, Yellow and Luminous
Other colours and sizes available upon request.

EASY INSTALL COUNTERTOP PROTECTION

Our countertop trivets are made of high quality stainless steel and are designed to be installed onto countertops to protect against hot cookware like pans, pots, grills, plates, kettles etc. avoiding possible damage caused by heat.

The Eazi-Trivet countertop system is a perfect option for all types of countertops, especially the quartz, granite and wood tops which can be easily damaged by direct heat.

Kits contain 8 x 25mm dia stainless steel protectors
Comes complete with fitting stencil
Simply position, peel and press into place
